RE: ANNOUNCEMENT

Dear valued customer,

Satin Finish has always prided itself on being a company that manufactures and distributes high quality products that adhere to the highest standards for Health and Safety as well as environmental responsibility.

Since introducing our successful line of laminates (High Performance Flooring) we have solely sourced our products from Germany, and since their introduction they have been rated with the European standard E1, which is equal to or better than any North American requirement for Formaldehyde emissions.

At this time we would like to announce that our entire line of laminates is rated FloorScore Certified. FloorScore certification qualifies for the following:

- USGBC LEED criteria for EQ4.3 (carpet systems, flooring)
- Collaborative for High Performance Schools (CHPS) (low-emitting products)
- California Section 01350 Specification Standard Method, Version 1.1 (2010)
- Green Guide for Health Care
- ANSI/GBI 01-2010 Green Building Assessment Protocol for Commercial Buildings
- ASHRAE/USGBC/IES Standard 189.1 Standard for the Design of High-Performance Green Buildings
- NAHB ANSI National Green Building Standard

FloorScore certified manufacturers operate under a written quality control plan, which includes strict requirements for supply chain management. FloorScore tests to the CA Section 01350 Specification, which includes the Chronic Reference Exposure Levels (CRELs) concentrations established by the California Office of Environmental Health Hazard Assessment (OEHHA) and procedures developed by the US EPA.

This certification represents our continued commitment to Environmental responsibility, Health and Safety and continuous improvement. At Satin Finish we put the needs of our customers first, we have since 1922 and we will continue to do so into the future.

Kind Regards,

Lou Novelli
VP Sales
